Integrated Form Labels

www.chicagotag.com

Simplify your labeling process

Integrated form labels combine your shipping label and packing list into a single document. This means you no longer need to manually match the packing list and shipping label, resulting in more efficiency and fewer errors. This all-in-one shipping solution eliminates redundancies, reduces shipping supplies, streamlines your processes, and increases order accuracy. Simply print, label, and ship!

At Chicago Tag & Label, we help companies create solutions that fit their unique needs for picking, packing, and shipping products. We use only the highest quality materials in manufacturing. Our integrated laser labels are compatible with laser printers and customized to your software layout.

The convenience and simplicity of a custom-integrated label make it useful in a wide range of applications. These form labels can serve as:

- Integrated shipping labels
- Packing slips
- Barcode labels for tracking
- Invoices
- Customized labels with company logos
- Branded gift cards
- ... and more

Integrated labels are commonly used across many industries to create operational efficiencies in e-commerce/retail, healthcare, warehousing/logistics, and many others. These labels ensure that the proper products are being packed and shipped correctly.

Ideal for all market segments

Designed to your specifications

As a custom label manufacturer, we design custom form labels to fit your particular software, company branding, desired copy, and adhesion requirements. Available in standard and custom sheet sizes as well as blank and preprinted, this custom solution can help improve your operations while amplifying your brand and improving the customer experience.

Simply put, integrated form labels enable you to streamline your process, eliminate errors and achieve much greater throughput. The adhesive is applied to the area of the paper where the label is printed; the non-adhesive portion is reserved for printing the packing list. After the forms are printed, just peel the shipping label, apply, and place the packing lists inside the package. Simply print, label, and ship!

Benefits of integrated form labels

Implementing integrated form labels into your business process offers many advantages. This all-in-one solution allows you to streamline processes and save time.

Key benefits of custom-integrated label forms include:

- Reduced order-processing time
- Improved order accuracy
- Increased labor efficiency
- Significant cost savings
- Greater marketing visibility on each order
